

PS/2 KVM Console Extender

User Manual (GCE250)

Welcome

Thank you for purchasing the IOGEAR PS/2 KVM Console Extender that allows you to access your computer or KVM switch from up to 500 ft away, via a CAT5e cable. This unit is perfect for moving the console away from the computer or the KVM switch. Your console can be moved across the room or hall, out of the server room, or anywhere that is most convenient. It is also useful for security and monitoring purposes, where you can have the system unit in a secure area at the same time that you put the console in the most convenient location for user access and monitoring. A PS/2 KVM Console Extender is a cost effective solution because it uses inexpensive UTP (CAT5e) cabling to extend the distance, versus expensive and bulky coaxial cabling. It is easy to install and operate because of the Auto Signal Compensation (ASC) technology, which senses the distance and adjusts the signal levels accordingly so there is no need to do any dip switch setting.

We hope that you will enjoy using your PS/2 KVM Extender and find it to be a useful solution.

This package contains:

- 1 PS/2 KVM Extender Local Unit
- 1 PS/2 KVM Extender Remote Unit
- 1 Custom KVM Cable
- 2 Power Adapters
- 1 User Manual
- 1 Warranty Registration Card

If any items are missing or damaged please contact your dealer.

Features

Features

- Allows remote access of up to 500ft away via CAT5e cables
- Auto Signal Compensation (ASC) helps make installation easy, with no need to configure dip switches
- Dual console operation - control your system from both the local and remote keyboards, mice, and monitors
- Easy to use - push button selection between local and remote consoles
- Plug-n-Play - no need to install any software driver
- High video resolution - up to 1280 x 1024
- Supports VGA, SVGA, and Multisync monitors
- Local monitor supports DDC; DDC2; DDC2B

Consoles:

- VGA, SVGA, or Multisync monitor
- PS/2 keyboard
- PS/2 mouse

Computers:

- *With PS/2 Type Connectors:*

VGA, SVGA or Multisync card.

6-pin PS/2 (mini-DIN) mouse port.

6-pin PS/2 (mini-DIN) keyboard port.

- *With AT Type Connectors:*

VGA, SVGA or Multisync card.

DB-9 (standard serial) mouse port plus mouse adapter*

5-pin DIN (standard AT) keyboard port plus keyboard adapter*

* Adapters not included, but can be purchased separately.

Cables:

- Category 5e rated UTP (Unshielded Twisted Pairs) cable with solid conductors is the minimum requirement to connect the GCE250 local unit to the GCE250 remote unit. Cable of a lesser standard will result in degrading of the video signal. For best performance, we strongly recommend Category 5e or Category 6 cables.

Introduction

GCE250 Local Unit Front View

1. Operating Mode Selection Switch

Pressing this button cycles you through the operating mode choices:

- Local - only the local console can control the system(s);
- Auto - both consoles can control the system(s).

2. LEDs

The Local Unit has two LEDs to indicate the operating status of the Local and Remote units.

3. Mouse Ports

The local PS/2 mouse plugs into this connector.

4. Keyboard Port

The local PS/2 keyboard plugs into this connector.

5. Monitor Port

The local monitor plugs into this port.

6. Remote I/O

The Category 5e cable that connects to the Remote Unit plugs into this connector.

7. Power Jack

The cable from the AC Power Adapter plugs into this jack.

GCE250 Local Unit Rear View

1. Monitor Port

The HDB-15 Video connector of the KVM cable that connects to the computer's or KVM switch's video port plugs into this port.

2. Keyboard Port

The keyboard connector of the KVM cable that connects to the computer's or KVM switch's keyboard port plugs into this port.

3. Mouse Port

The mouse connector of the KVM cable that connects to the computer's or KVM switch's mouse port plugs into this port.

Introduction

GCE250 Remote Unit Front View

1. LEDs

The Remote Unit has two LEDs (Power and On Line) to indicate the operating status of the Local and Remote units.

2. Mouse Port

The remote PS/2 mouse plugs into this connector.

3. Keyboard Port

The remote PS/2 keyboard plugs into this connector.

4. Monitor Port

The remote monitor plugs into this connector.

5. Remote I/O

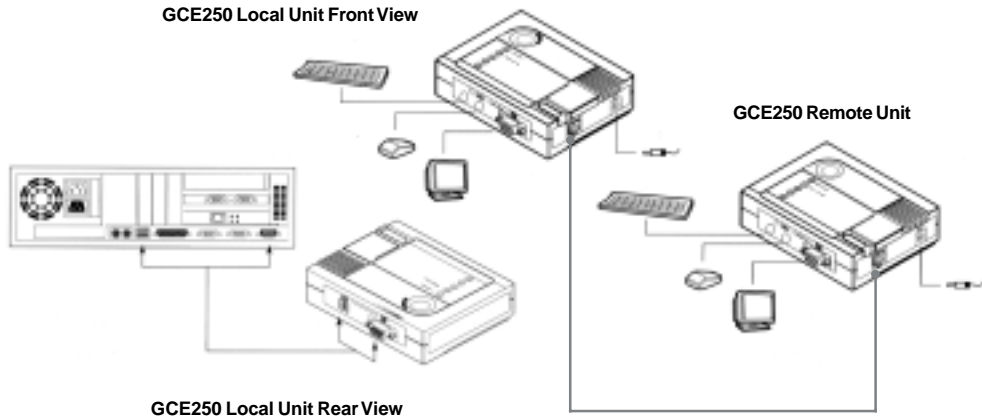

The Category 5 cable that connects to the Local Unit plugs into this connector.

6. Power Jack

The cable from the AC Power Adapter plugs into this jack.

Setting up the PS/2 KVM Extender System is simply a matter of plugging in the cables:

Installation

Installation

1. Make sure that all the equipment to be connected is powered off.
2. Plug the cables from the local console devices (mouse, keyboard, monitor), into their ports on the Console side of the GCE250 Local Unit. Each port is marked with an appropriate icon to indicate which it is. (This step is optional, you may operate with remote consoles only).
3. Plug the appropriate connectors on the KVM cable supplied with this unit into the CPU side of the GCE250 Local Unit. Each connector is marked with an appropriate icon to indicate what it is.
4. Plug the connectors on the other end of the KVM cable into the appropriate ports on the computer (or Console section of the KVM switch). Each connector is marked with an appropriate icon to indicate what it is.
5. Plug one end of the Category 5e cable into the I/O port of GCE250's Local Units.
6. Plug one of the power adapters (supplied with this package) into the AC source; then plug the adapter's power cable into the power jack.
7. Plug the other end of the Category 5e cable into the I/O port of GCE250's Remote Units.
8. Plug the cables from the remote console devices (mouse, keyboard, monitor), into their ports on the

Console side of the GCE250 Remote Unit. Each port is marked with an appropriate icon to indicate itself.

9. Plug the second power adapter (supplied with this package) into an AC source at the remote location; plug the adapter's power cable into the power jack.

Operation

Operation:

Once the installation is completed, you can access your computer and KVM switch from either local or remote console.

You can select either local or auto by pushing the SELECT button. The auto mode allows either console to take over, and allow the other console to view.

The Local and Remote Units each have two LEDs to indicate their operating status, as shown in the tables below:

Local Unit:

LED	Operating Mode	
	Local	Auto
Local	Lights to indicate that the local console is active	<ol style="list-style-type: none"> 1. Lights when the local console is active (the Remote LED is out). 2. Turns off when the remote console is active (the Remote LED turns on). 3. Flashes on and off alternately with the Remote LED when neither console is active.
Remote	The LED is off to indicate that the remote console is non-active	<ol style="list-style-type: none"> 1. Lights when the remote console is active (the local LED is out). 2. Turns off when the local console is active (the local LED turns on). 3. Flashes on and off alternately with the local LED when neither console is active.

Operation

Remote Unit:

LED	Indication
Status	<ol style="list-style-type: none">1. Lights steadily to indicate that the connection to the Local Unit is OK.2. Flashes when there is a problem with the connection to the Local Unit.
On Line	<ol style="list-style-type: none">1. Lights when the Remote console is active.2. Turns off when the Local console is active.3. Is Off when there Remote Unit is not connected to the Local Unit.

Troubleshooting

Symptoms	Action
No Video	Make sure that all cables are securely plugged into their sockets
Not reaching the distance specified	Make sure that you use Category 5e or Category 6 cable with solid conductors. Using stranded patch cables will affect the distance.

Please check out our IOGEAR Tech Info Library (T.I.L.) at www.iogear.com/support for the latest tips, tricks, and troubleshooting. The IOGEAR T.I.L. was designed to provide you with the latest technical information about our products. Most of the answers to your questions can be found here, so please try it out before contacting technical support. Service Support can be reached at IOGEAR® from 8am to 5pm Pacific Standard Time, Monday through Friday or at the following address:

23 Hubble Drive
Irvine, CA 92618

You may also reach us online at www.iogear.com/support 24 hours a day. Please be ready to give a brief description of the problem, and what you were doing when the problem occurred, before calling Service Support. The Service Support representative will be able to serve you much quicker if you are prepared to answer the following questions listed below.

- 1) What version of OS are you using?
- 2) What type of computer are you using?
- 3) Can the problem be reproduced? If so, what are the steps necessary to reproduce the problem
- 4) When does the problem occur?
- 5) What have you already tried to get the problem resolved?
- 6) What is the purchase date and serial number of the product?
- 7) Are you on a network? If so, what type of network is it?
- 8) Where any messages displayed on the screen when the error occurred? If so, what was the exact wording of the message?
