# To reset Cat5 KVM Board (standalone KVM)
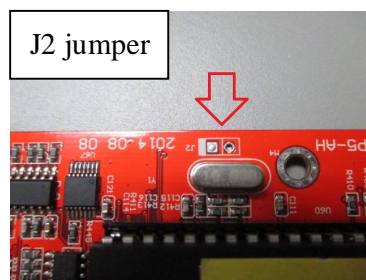

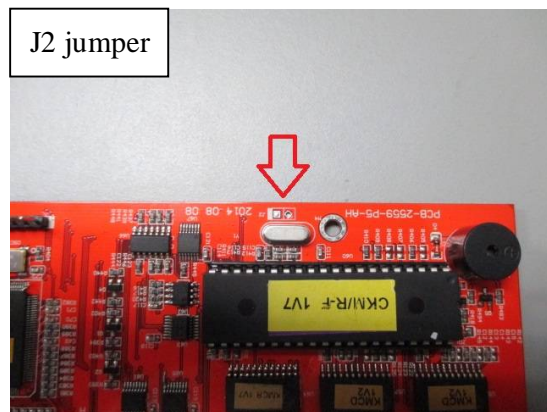

(1) Before your work, please make sure that **the power is disconnected.**

Step 1: Remove the casing cover screws.

        (2 on the top, 3 on the bottom, 2 on each side)

Step 2: Find the jumper J2, then use either paper clip or scissors to touch the two boxes of J2, then plug in the power while holding the jumper in order to close/short the jumper 5 ~ 10 second, then you will hear beep sound when it reset.

J2 jumper

J2 jumper

Step 3: Please reverse the procedures to assemble back the unit.
