HIGH PERFORMANCE KVM-OVER-IP SOLUTION

The Dominion® KX III is an enterprise-class KVM-over-IP switch that provides 1, 2, 4 or 8 users with remote BIOS-level control of 8 to 64 servers. It comes with standard features such as DVI/HDMI/DisplayPort digital and analog video, audio, virtual media, smart card/CAC, blade server support, and mobile access. Deploy it alone, or with Raritan’s CommandCenter® Secure Gateway (CC-SG) for centralized access to all KX IIIs; or with the KX III User Station for hassle-free IP KVM access.

IT, DATA CENTERS AND LABS

Eliminate trips to the data center! Virtual Media lets administrators remotely install software, transfer files, and back up data. Manage up to 8 serial devices with the new Dominion Serial Access Modules (DSAM). Users can even access and manage servers via Apple iOS devices through Raritan’s CommandCenter Secure Gateway.

BROADCAST AND ENTERTAINMENT

The KX III’s next generation video processing engine supports dynamic broadcast applications that require 1920x1200 HD resolution, 24 bit color, digital audio, dual monitors and DVI, HDMI, DisplayPort and VGA video. View streaming 1080p video at 30 frames-per-second over your LAN. New high performance IP User Station now available for labs and studios. Fast connections and sub-second switching available with the DKK3-808 model.

MILITARY GRADE SECURITY AND RELIABILITY

KX III meets widely used U.S. and Canadian government security mandates like: FIPS 140-2 certified cryptographic module, smart-card/CAC authentication, two factor RSA SecurID authentication, and IPv6. And with dual power supplies and dual gigabit Ethernet ports, it is the most reliable and secure digital KVM switch in the industry.
